Vol. 55

THE AUSTRALIAN JOURNAL OF EXPERIMENTAL BIOLOGY AND MEDICAL SCIENCE

Editor	D. ROWLEY	
Deputy Editor	I. KOTLARSKI	
Assistant Editors	G. L. Ada	W. E. Glover
	A. Basten	F. R. Magarey
	J. P. Chalmers	G. F. Mitchell
	E. G. Cleary	D. Nelson
	G. N. Cooper	J. H. Pope
	P. D. Cooper	A. B. Roy
	W. H. Elliott	D. N. Wade
	J. A. Young	

PUBLISHED BY THE UNIVERSITY OF ADELAIDE

PART 1, FEBRUARY, 1977

Special Article:— PAGE

D. Rowley: The problems of oral immunisation - - - - 1

Microbiology:

A. H. Reisner and N. H. Westwood: Determination of the relatedness of the soluble surface proteins of *Trypanosoma brucei* and *Paramecium aurelia* - - - - - - - - - - 19

Immunology:

K. O. Cox, Helen Baddams and Anne Evans: Studies of the antigenicity and immunogenicity of bromelain-pretreated red blood cells - - - - - - - - - - - - - - 27

Tikky Pang, Marion E. Andrew, Roger W. Melvold and Robert V. Blanden: Specificity or affinity of cytotoxic T cells for self H-2K determinants apparently does not change between primary and secondary responses to ectromelia virus infection - - - 39

D. B. Adams: The effect of thymectomy in guinea pigs on the lymphocyte content of central lymph - - - - - 49

Patricia Price and R. G. Bell: Factors determining the effects of chronic protein-deficiency on antibody responses to sheep red blood cells and *Brucella abortus* vaccine in mice - - - 59

Virology:

Gwendolyn Woodroofe, Ian D. Marshall and William P. Taylor: Antigenically distinct strains of Ross River virus from North Queensland and coastal New South Wales - - - - - 79

Pharmacology:

A. Foldes, R. J. Head and I. S. de la Lande: Endogenous and exogenous histamine in rabbit thoracic aorta - - - - 89

PART 2, APRIL, 1977

Special Article:— PAGE

R. L. DOHERTY: Arthropod-borne viruses in Australia, 1973-1976 - 103

VIROLOGY:

R. L. DOHERTY, C. FILIPPICH, J. G. CARLEY AND J. Y. HANCOCK: Antibody to togaviruses in the Northern Territory and adjoining areas of Australia - - - - - - - - - - - - 131

IMMUNOLOGY:

GREGORY W. WARR, JANET M. DECKER, THOMAS E. MANDEL, DOMINICK DELUCA, RICHARD HUDSON AND JOHN J. MARCHALONIS: Lymphocyte-like cells of the tunicate, *Pyura stolonifera*: Binding of lectins, morphological and functional studies - - - - - 151

GRAHAM F. MITCHELL, JAMES W. GODING AND MICHAEL D. RICKARD: Studies on immune responses to larval cestodes in mice. Increased susceptibility of certain mouse strains and hypothymic mice to *Taenia taeniaeformis* and analysis of passive transfer of resistance with serum - - - - - - - - - - - - - 165

GRAHAM F. MITCHELL, JOHN J. MARCHALONIS, PATRICIA M. SMITH, WARWICK L. NICHOLAS AND NOEL L. WARNER: Studies on immune responses to larval cestodes in mice. Immunoglobulins associated with the larvae of *Mesocestoides corti* - - - - - - - 187

PHARMACOLOGY:

R. J. HEAD, G. A. CRABB, I. S. DE LA LANDE AND D. B. FREWIN: Semi-automated catecholamine assay - - - - - - - - 213

Brief Communication:—

H. S. TAM, D. B. FREWIN, K. ELLIOTT, W. K. LUKE AND J. A. DOWNEY: The effect of aspirin pretreatment on the sweating response of older female subjects - - - - - - - - - - - 225

BIOLOGY:

R. D. JOLLY, N. S. VAN-DE-WATER, R. B. RICHARDS AND P. R. DORLING: Generalized glycogenosis in beef Shorthorn cattle—heterozygote detection - - - - - - - - - - - - - 141

Brief Communication:—

S. R. COLE, P. R. BAVERSTOCK AND B. GREEN: Lack of genetic differentiation between domestic dogs and dingoes at a further 16 loci - 229

PART 3, JUNE, 1977

PATHOLOGY: PAGE

J. E. PETERSON AND MARJORIE V. JAGO: Brain damage by extracts of parasitised annual ryegrass (*Lolium rigidum*) in nursling rats - - - - - - 233

W. F. CAREY AND A. C. POLLARD: Variability of fibroblast lysosomal acid hydrolases with reference to the detection of enzyme deficiencies - - - 245

W. F. CAREY, P. V. NELSON AND A. C. POLLARD: Considerations in the prenatal assessment of lysosomal enzyme deficiency in eight cases at risk - - - 253

IMMUNOLOGY:

K. J. BEH: The origin of IgA-containing cells in intestinal lymph of sheep - - 263

A. FERRANTE AND C. R. JENKIN: Surface immunoglobulins, a possible mechanism for the persistence of *Trypanosoma lewisi* in the circulation of rats - - 275

Brief Communication:—

D. KEAST AND C. CALAGERO: Erythrocyte autoantibodies induced in mice immunized with rat antigens - - - - - - - - - - - 359

PHYSIOLOGY:

I. BERTONCELLO AND T. R. BRADLEY: The physicochemical properties of erythrocyte derived activity which enhances murine bone marrow colony growth in agar culture - - - - - - - - - - - - - - - - 281

J. DENT, J. CULROSS AND J. M. MORRIS: A pneumatically driven pump for constant perfusion manometry - - - - - - - - - - - - 293

Brief Communication:—

P. TSO AND W. J. SIMMONDS: Importance of luminal lecithin in intestinal absorption and transport of lipid in the rat - - - - - - - - - - 355

MICROBIOLOGY:

R. BRENT DAVEY AND JAMES PITTARD: Plasmids mediating resistance to gentamicin and other antibiotics in *Enterobacteriaceae* from four hospitals in Melbourne 299

BIOCHEMISTRY:

P. W. KUCHEL, D. V. ROBERTS AND L. W. NICHOL: The simulation of the urea cycle: correlation of effects due to inborn errors in the catalytic properties of the enzymes with clinical-biochemical observations - - - - - - 309

P. J. HEALY: Intestinal brush border and lysosomal enzymes and immunoglobulin absorption in the newly-born lamb - - - - - - - - - - 327

HILARY J. JEFFREY AND ALEXANDER B. ROY: Micelles of cerebroside sulphate - 339

GENETICS:

C. H. S. WATTS, P. R. BAVERSTOCK AND S. R. COLE: Genetic similarities and differences between sublines of certain inbred strains of mice held within Australia - - - - - - - - - - - - - - - - 347

PART 4, AUGUST, 1977

BIOCHEMISTRY: PAGE

P. A. HARRIS, R. W. STEPHENS, P. GHOSH AND T. K. F. TAYLOR: Endo- and exoglycosidases in an experimental rat osteosarcoma - - - - - 363

FELIX A. SHAMGAR AND THE LATE FREDERICK D. COLLINS: Incorporation of [2-^{3}H] ethanolamine into rat muscle phosphoglycerides - - - - - 371

Brief Communication:—

HIROSHIGE HIBASAMI, MINORU TANAKA, JUN NAGAI AND TADAO IKEDA: Changes in ornithine decarboxylase activity and cyclic adenosine-3′-5′-monophosphate concentrations during the cell cycle of synchronized BHK cells - - - 379

IMMUNOLOGY:

L. BLOOM AND D. ROWLEY: Re-examination of small intestinal disposal of *Vibrio cholerae* in mice - - - - - - - - - - - - - 385

V. CHAICUMPA, S. J. PROWSE, P. L. EY AND C. R. JENKIN: Induction of immunity in mice to the nematode parasite, *Nematospiroides dubius* - - - - - 393

J. SEARLE, J. F. R. KERR, C. BATTERSBY, W. S. EGERTON, G. BALDERSON AND W. BURNETT: An electron microscopic study of the mode of donor cell death in unmodified rejection of pig liver allografts - - - - - - - 401

M. M. DON, G. ABLETT, C. J. BISHOP, P. G. BUNDESEN, K. J. DONALD, J. SEARLE AND J. F. R. KERR: Death of cells by apoptosis following attachment of specifically allergized lymphocytes *in vitro* - - - - - - - 407

Brief Communication:—

KEVIN J. FAHEY: Humoral and cell-mediated immune responses in foetal sheep following vaccination with BCG - - - - - - - - - 419

MICROBIOLOGY:

VALERIE BURKE, M. HOUGHTON AND M. GRACEY: Effect of enteric micro-organisms on intestinal sugar and fatty acid absorption - - - - - 423

Brief Communication:—

HERBERT J. HARWICK, GEORGE M. KALMANSON AND LUCIEN B. GUZE: Chemotactic activity of L-forms and mycoplasma - - - - - - - 431

PHARMACOLOGY:

H. J. CORNELL AND H. C. WILMOT: Partial purification of somatomedin from human plasma - - - - - - - - - - - - - - - 435

ANDREW FOLDES AND MICHAEL J. STACEY: The metabolism of exogenous histamine by aortic tissues - - - - - - - - - - - - - - 441

PETER W. GAGE AND IAN SPENCE: The origin of the muscle fasciculation caused by funnel-web spider venom - - - - - - - - - - - 453

PHYSIOLOGY:

P. H. WISE: Significance of anomalous thermoregulation in the pre-diabetic spiny mouse (*Acomys cahirinus*): oxygen consumption and temperature regulation 463

P. H. WISE: Significance of anomalous thermoregulation in the pre-diabetic spiny mouse (*Acomys cahirinus*): cold tolerance: blood glucose and food consumption responses to environmental heat - - - - - - - - - 475

VIROLOGY:

Brief Communication:—

R. L. DOHERTY, J. G. CARLEY, CHERYL FILIPPICH, B. H. KAY, B. M. GORMAN AND N. RAJAPAKSA: Isolation of Sindbis (alphavirus) and Leanyer viruses from mosquitoes collected in the Northern Territory of Australia, 1974 - 485

PART 5, OCTOBER, 1977

VIROLOGY: PAGE

T. D. ST. GEORGE, H. A. STANDFAST, R. L. DOHERTY, J. G. CARLEY, CHERYL FILLIPICH AND JANET BRANDSMA: The isolation of Saumarez Reef virus, a new flavivirus, from bird ticks *Ornithodoros capensis* and *Ixodes eudyptidis* in Australia - - - 493

IMMUNOLOGY:

MAUREEN C. HOWARD AND JOHN M. FIDLER: Antigen-initiated B lymphocyte differentiation: non-specific stimulation changes the physical properties of virgin AFC-progenitors in neonatal mouse spleen - - - - - - - - - - - - 501

D. B. ADAMS AND A. W. CRIPPS: Cellular changes in the intestinal lymph of sheep infected with the enteric nematode, *Trichostrongylus colubriformis* - - - - - - - - - 509

KEVIN J. FAHEY: The response of foetal sheep to the somatic and flagellar antigens of *Salmonella typhimurium* - - - - 523

T. PANG AND R. V. BLANDEN: Requirements for stimulation of T cell responses against virus-infected cells: nature of ectromelia virus-infected cells capable of stimulating cytotoxic T cells in a secondary response *in vitro* - - - - - - - - - 539

T. PANG AND R. V. BLANDEN: Genetic factors in the stimulation of T cell responses against ectromelia virus-infected cells: role of *H-2K*, *H-2D* and *H-2I* genes - - - - - - - - - 549

V. CHAICUMPA, C. R. JENKIN AND H. FISCHER: The effect *in vivo* of peritoneal exudate cells of immune and normal mice on the infectivity of the third stage larvae of *Nematospiroides dubius* 561

R. G. BELL AND LEE A. HAZELL: The influence of dietary protein insufficiency on the murine thymus. Evidence for an intrathymic pool of progenitor cells capable of thymus regeneration after severe atrophy - - - - - - - - - - - - 571

KEN SHORTMAN, AINA RYDEN, MARGARET DUNKLEY AND HARALD VON BOEHMER: Some requirements for the response of separated T-cell sub-populations to the mitogens phytohaemagglutinin and Concanavalin A - - - - - - - - - - - - 585

J. H. LIVESEY, D. RUBINSTEIN AND J. C. BECK: Studies on the nature of porcine pituitary large growth hormone - - - - - - 605

GRAHAM F. MITCHELL AND EMANUELA HANDMAN: Studies on immune responses to larval cestodes in mice: a simple mechanism of non-specific immunosuppression in *Mesocestoides corti*-infected mice - - - - - - - - - - - - - - 615

PART 6, DECEMBER, 1977

OBITUARY: PAGE

DONALD LANCELOT WILHELM - - - - - - - - - - 623

GENETICS:

J. A. M. GRAVES, R. M. HOPE AND A. MACGREGOR: Fusion and hybridization of marsupial and eutherian cells. Heterokaryon formation - - - - - - - - - - - - - - 625

VIROLOGY:

J. C. DOWNIE, V. HINSHAW AND W. G. LAVER: The ecology of influenza. Isolation of type 'A' influenza viruses from Australian pelagic birds - - - - - - - - - - - - - 635

Brief Communications:—

M. H. JUN, N. KARABATSOS AND R. H. JOHNSON: A new mouse paramyxovirus (J virus) - - - - - - - - - - 645

R. C. RUSSELL, L. G. MUKWAYA AND M. LULE: Laboratory studies on the transmission of yellow fever virus by *Aedes* (*Finlaya*) *notoscriptus* (Dipt., culicidae) - - - - - - - - - 649

BIOCHEMISTRY:

J. P. LONGENECKER AND J. F. WILLIAMS: A test for foetal gene expression at the level of transcription in hepatomas - - - - 653

PHARMACOLOGY:

J. D. BAGGOT: Pharmacokinetics of sulfadimethoxine in cats - - 663

Review:—

R. W. BURY AND M. L. MASHFORD: Substance P: its pharmacology and physiological roles - - - - - - - - - - - 671

Brief Communication:—

D. C. GERKE, D. B. FREWIN AND B. R. FROST: The synergistic vasoconstrictor effect of octapressin and catecholamines on the isolated rabbit ear artery - - - - - - - - - - - 737

PHYSIOLOGY:

H. M. MILLER AND S. P. WOODHOUSE: Long chain fatty acid inhibition of sodium plus potassium-activated adenosine triphosphatase from rat heart - - - - - - - - - - - - - 741

THE AUSTRALIAN JOURNAL OF EXPERIMENTAL BIOLOGY AND MEDICAL SCIENCE

VOLUME 55

SUBJECT INDEX

BIOCHEMISTRY

Cerebroside sulphate, micelles of (Jeffrey and Roy), 339.

Cyclic adenosine-3′-5′-monophosphate concentrations, and ornithine decarboxylase activity, changes in, during the cell cycle of synchronized BHK cells (Hibasami, Tanaka, Nagai and Ikeda), 379.

Endo- and exoglycosidases in an experimental rat osteosarcoma (Harris, Stephens, Ghosh and Taylor), 363.

Enzyems, intestinal brush border and lysosomal, and immunoglobulin absorption in the newly-born lamb (Healy), 327.

[2-^{3}H]Ethanolamine, incorporation of, into rat muscle phosphoglycerides (Shamgar and Collins), 371.

Foetal gene expression, a test for, at the level of transcription in hepatomas (Longenecker and Williams), 653.

Hepatomas, a test for foetal gene expression at the level of transcription in (Longenecker and Williams), 653.

Immunoglobulin absorption in the newly-born lamb, intestinal brush border and lysosomal enzymes and (Healy), 327.

Muscle phosphoglycerides, rat, incorporation of [2-^{3}H]ethanolamine into (Shamgar and Collins), 371.

Ornithine decarboxylase activity and cyclic adenosine-3′-5′-monophosphate concentrations, changes in, during the cell cycle of synchronized BHK cells (Hibasami, Tanaka, Nagai and Ikeda), 379.

Osteosarcoma, experimental rat, endo- and exoglycosidases in an (Harris, Stephens, Ghosh and Taylor), 363.

Urea cycle, the simulation of the, correlation of effects due to inborn errors in the catalytic properties of the enzymes with clinical-biochemical observations (Kuchel, Roberts and Nichol), 309.

BIOLOGY

Cattle, beef Shorthorn, generalized glycogenosis in—heterozygote detection (Jolly, Vande-Water, Richards and Dorling), 141.

Dingoes, lack of genetic differentiation between domestic dogs and, at a further 16 loci (Cole, Baverstock and Green), 229.

Glycogenosis, generalized, in beef Shorthorn cattle—heterozygote detection (Jolly, Vande-Water, Richards and Dorling), 141.

Shorthorn cattle, *see* Cattle, Shorthorn.

GENETICS

Genetic similarities and differences between sublines of certain inbred strains of mice held within Australia (Watts, Baverstock and Cole), 347.

Heterokaryon formation. Fusion and hybridization of marsupial and eutherian cells (Graves, Hope and Macgregor), 625.

Mice, certain inbred strains of, held within Australia, genetic similarities and differences between sublines of (Watts, Baverstock and Cole), 347.

IMMUNOLOGY

Allografts, pig liver, an electron microscopic study of the mode of donor cell death in unmodified rejection of (Searle, Kerr, Battersby, Egerton, Balderson and Burnett), 401.

Antibody responses to sheep red blood cells and *Brucella abortus* vaccine in mice, factors determining the effects of chronic protein-deficiency on (Price and Bell), 59.

Antigenicity and immunogenicity of bromelain-pretreated red blood cells, studies of the (Cox, Baddams and Evans), 27.

Autoantibodies, erythrocyte, induced in mice immunized with rat antigens (Keast and Calagero), 359.

BCG, humoral and cell-mediated immune responses in foetal sheep following vaccination with (Fahey), 419.

Bromelain-pretreated red blood cells, studies of the antigenicity and immunogenicity of (Cox, Baddams and Evans), 27.

Cell death, donor, an electron microscopic study of the mode of, in unmodified rejection of pig liver allografts (Searle, Kerr, Battersby, Egerton, Balderson and Burnett), 401.

Cells, death of, by apoptosis, following attachment of specifically allergized lymphocytes *in vitro* (Don, Ablett, Bishop, Bundesen, Donald, Searle and Kerr), 407.

Cestodes, larval, in mice, studies on immune responses to: a simple mechanism of non-specific immunosuppression in *Mesocestoides corti*-infected mice (Mitchell and Handman), 615.

Cestodes, larval, in mice, studies on immune responses to. Immunoglobulins associated with the larvae of *Mesocestoides corti* (Mitchell, Marchalonis, Smith, Nicholas and Warner), 187.

Cestodes, larval, in mice, studies on immune responses to. Increased susceptibility of certain mouse strains and hypothymic mice to *Taenia taeniaeformis* and analysis of passive transfer of resistance with serum (Mitchell, Goding and Rickard), 165.

Cytotoxic T cells, *see* T cells, cytotoxic.

Foetal sheep, humoral and cell-mediated immune responses in, following vaccination with BCG (Fahey), 419.

Foetal sheep, the response of, to the somatic and flagellar antigens of *Salmonella typhimurium* (Fahey), 523.

Genetic factors in the stimulation of T cell responses against ectromelia virus-infected cells: role of *H-2K*, *H-2D* and *H-2I* genes (Pang and Blanden), 549.

H-2K determinants, self, specificity or affinity of cytotoxic T cells for, does not change between primary and secondary responses to ectromelia virus infection (Pang, Andrew, Melvold and Blanden), 39.

IgA-containing cells in the intestinal lymph of sheep (Beh), 263.

Immune responses to larval cestodes in mice, studies on: a simple mechanism of non-specific immunosuppression in *Mesocestoides corti*-infected mice (Mitchell and Handman), 615.

Immunisation, oral, the problems of (Rowley), 1.

Immunity, induction of, in mice to the nematode parasite, *Nematospiroides dubius* (Chaicumpa, Prowse, Ey and Jenkin), 393.

Lymph, intestinal, of sheep infected with the enteric nematode, *Trichostrongylus colubriformis*, cellular changes in the (Adams and Cripps), 509.

Lymph, intestinal, of sheep, the origin of IgA-containing cells in (Beh), 263.

Lymphocyte, B, differentiation, antigen-initiated. Non-specific stimulation changes the physical properties of virgin AFC-progenitors in neonatal mouse spleen (Howard and Fidler), 501.

Lymphocyte content of central lymph, the effect of thymectomy in guinea pigs on the (Adams), 49.

Lymphocyte-like cells of the tunicate, *Pyura stolonifera*: binding of lectins, morphological and functional studies (Warr, Decker, Mandel, De Luca, Hudson and Marchalonis), 151.

Lymphocytes, specifically allergized, death of cells by apoptosis following attachment of, *in vitro* (Don, Ablett, Bishop, Bundesen, Donald, Searle and Kerr), 407.

Mesocestoides corti, *see* Cestodes.

Mice immunized with rat antigens, erythrocyte autoantibodies induced in (Keast and Calagero), 359.

Mice, studies on immune responses to larval cestodes in. Immunoglobulins associated with the larvae of *Mesocestoides corti* (Mitchell, Marchalonis, Smith, Nicholas and Warner), 187.

Mice, studies on immune responses to larval cestodes in. Increased susceptibility of certain mouse strains and hypothymic mice to *Taenia taeniaeformis* and analysis of passive transfer of resistance with serum (Mitchell, Goding and Rickard), 165.

Mitogens, phytohaemagglutinin and Concanavalin A, some requirements for the response of separated T-cell sub-populations to the (Shortman, Ryden, Dunkley and Von Boehmer), 585.

Nematospiroides dubius, induction of immunity in mice to the nematode parasite (Chaicumpa, Prouse, Ey and Jenkin), 393.

Nematospiroides dubius, the effect *in vivo* of peritoneal exudate cells of immune and normal mice on the infectivity of the third stage larvae of (Chaicumpa, Jenkin and Fischer), 561.

Peritoneal exudate cells of immune and normal mice, the effect *in vivo* of, on the infectivity of the third stage larvae of *Nematospiroides dubius* (Chaicumpa, Jenkin and Fischer), 561.

Pituitary large growth hormone, porcine, studies on the nature of (Livesey, Rubinstein and Beck), 605.

Protein-deficiency, chronic, factors determining the effects of, on antibody responses to sheep red blood cells and *Brucella abortus* vaccine in mice (Price and Bell), 59.

Protein insufficiency, dietary, the influence of, on the murine thymus. Evidence for an intrathymic pool of progenitor cells capable of thymus regeneration after severe atrophy (Bell and Hazell), 571.

Pyura stolonifera, *see* Tunicate.

Rats, surface immunoglobulins, a possible mechanism for the persistence of *Trypanosoma lewisi* in the circulation of (Ferrante and Jenkin), 275.

Salmonella typhimurium, the response of foetal sheep to the somatic and flagellar antigens of (Fahey), 523.

T cell responses against ectromelia virus-infected cells, genetic factors in the: role of *H-2K*, *H-2D* and *H-2I* genes (Pang and Blanden), 549.

T cell responses against virus-infected cells, requirements for stimulation of: nature of ectromelia virus-infected cells capable of stimulating cytotoxic T cells in a secondary response *in vitro* (Pang and Blanden), 539.

T-cell sub-populations, separated, some requirements for the response of, to the mitogens phytohaemagglutinin and Concanavalin A (Shortman, Ryden, Dunkley and Von Boehmer), 585.

T cells, cytotoxic, specificity or affinity of, for self H-2K determinants apparently does not change between primary and secondary responses to ectromelia virus infection (Pang, Andrew, Melvold and Blanden), 39.

Taenia taeniaeformis, *see* Cestodes.

Thymectomy in guinea pigs, the effect of, on the lymphocyte content of central lymph (Adams), 49.

Thymus, murine, the influence of dietary protein insufficiency on the. Evidence for an intrathymic pool of progenitor cells capable of thymus regeneration after severe atrophy (Bell and Hazell), 571.

Trichostrongylus colubriformis, the enteric nematode, cellular changes in the intestinal lymph of sheep infected with (Adams and Cripps), 509.

Trypanosoma lewisi in the circulation of rats, surface immunoglobulins, a possible mechanism for the persistence of (Ferrante and Jenkin), 275.

Tunicate, *Pyura stolonifera*, lymphocyte-like cells of the: binding of lectins, morphological and functional studies (Warr, Decker, Mandel, De Luca, Hudson and Marchalonis), 151.

Vibrio cholerae, re-examination of small intestinal disposal of, in mice (Bloom and Rowley), 385.

Virus-infected cells, requirements for stimulation of T cell responses against: nature of ectromelia virus-infected cells capable of stimulating cytotoxic T cells in a secondary response *in vitro* (Pang and Blanden), 539.

MICROBIOLOGY

Chemotactic activity of L-forms and mycoplasma (Harwick, Kalmanson and Guze), 431.

Gentamicin and other antibiotics, plasmids mediating resistance to, in *Enterobacteriaceae* from four hospitals in Melbourne (Davey and Pittard), 299.

Intestinal sugar and fatty acid absorption, effect of enteric micro-organisms on (Burke, Houghton and Gracey), 423.

L-forms and mycoplasma, chemotactic activity (Harwick, Kalmanson and Guze), 431.

Micro-organisms, enteric, effect of, on intestinal sugar and fatty acid absorption (Burke, Houghton and Gracey), 423.

Plasmids mediating resistance to gentamicin and other antibiotics in *Enterobacteriaceae* from four hospitals in Melbourne (Davey and Pittard), 299.

Proteins, soluble surface, of *Trypanosome brucei* and *Paramecium aurelia*, determination of the relatedness of the (Reisner and Westwood), 19.

Trypanosoma brucei and *Paramecium aurelia*, determination of the relatedness of the soluble surface proteins of (Reisner and Westwood), 19.

OBITUARY

Wilhelm, Donald Lancelot, 623.

PATHOLOGY

Brain damage by extracts of parasitised annual ryegrass (*Lolium rigidum*) in nursling rats (Peterson and Jago), 233.

Enzyme deficiencies, variability of fibroblast lysosomal acid hydrolases with reference to the detection of (Carey and Pollard), 245

Enzyme deficiency, lysosomal, consideration in the prenatal assessment of, in eight cases at risk (Carey, Nelson and Pollard), 253.

Fibroblast lysosomal acid hydrolases, variability of, with reference to the detection of enzyme deficiencies (Carey and Pollard), 245.

Lolium rigidum, *see* Ryegrass, annual.

Prenatal assessment of lysosomal enzyme deficiency in eight cases at risk, considerations in (Carey, Nelson and Pollard), 253.

Ryegrass, annual (*Lolium rigidum*), parasitised, brain damage by extracts of, in nursling rats (Peterson and Jago), 233.

PHARMACOLOGY

Aorta, rabbit thoracic, endogenous and exogenous histamine in (Foldes, Head and De la Lande), 89.

Aortic tissues, the metabolism of exogenous histamine by (Foldes and Stacey), 441.

Aspirin pretreatment, the effect of, on the sweating response of older female subjects (Tam, Frewin, Elliott, Luke and Downey), 225.

Catecholamine assay, semi-automated (Head, Crabb, De la Lande and Frewin), 213.

Funnel-web spider venom, the origin of the muscle fasciculation caused by (Gage and Spence), 453.

Histamine, endogenous and exogenous, in rabbit thoracic aorta (Foldes, Head and De la Lande), 89.

Histamine, exogenous, the metabolism of, by aortic tissues (Foldes and Stacey), 441.

Muscle fasciculation, the origin of the, caused by funnel-web spider venom (Gage and Spence), 453.

Octapressin and catecholamines, the synergistic vasoconstrictor effect of, on the isolated rabbit ear artery (Gerke, Frewin and Frost), 737.

Somatomedin from human plasma, partial purification of (Cornell and Wilmot), 435.

Substance P: its pharmacology and physiological roles (Bury and Mashford), 671.

Sulfadimethoxine, pharmacokinetics of, in cats (Baggot), 663.

Sweating response of older female subjects, the effect of aspirin pretreatment on the (Tam, Frewin, Elliott, Luke and Downey), 225.

Vasoconstrictor effect, the synergistic, of octapressin and catecholamines on the isolated rabbit ear artery (Gerke, Frewin and Frost), 737.

PHYSIOLOGY

Acomys cahirinus, *see* Spiny mouse.

Adenosine triphosphatase, sodium plus potassium-activated, from rat heart, long chain fatty acid inhibition of (Miller and Woodhouse), 741.

Erythrocyte derived activity, the physicochemical properties of, which enhances murine bone marrow colony growth in agar culture (Bertoncello and Bradley), 281.

Fatty acid, long chain, inhibition of sodium plus potassium-activated adenosine triphosphatase from rat heart (Miller and Woodhouse), 741.

Lecithin, luminal, importance of, in intestinal absorption and transport of lipid in the rat (Tso and Simmonds), 355.

Manometry, constant perfusion, a pneumatically driven pump for (Dent, Culross and Morris), 293.

Murine bone marrow colony growth in agar culture, the physicochemical properties of erythrocyte derived activity which enhances (Bertoncello and Bradley), 281.

Pump, a pneumatically driven, for constant perfusion manometry (Dent, Culross and Morris), 293.

Spiny mouse (*Acomys cahirinus*), pre-diabetic, significance of anomalous thermoregulation in the: cold tolerance: blood glucose and food consumption responses to environmental heat (Wise), 475.

Spiny mouse (*Acomys cahirinus*), pre-diabetic, significance of anomalous thermoregulation in the: oxygen consumption and temperature regulation (Wise), 463.

Thermoregulation, anomalous, significance of, in the pre-diabetic spiny mouse (*Acomys cahirinus*): cold tolerance: blood glucose and food consumption responses to environmental heat (Wise), 475.

Thermoregulation, anomalous, significance of, in the pre-diabetic spiny mouse (*Acomys cahirinus*): oxygen consumption and temperature regulation (Wise), 463.

VIROLOGY

Aedes (*Finlaya*) *notoscriptus* (Dipt., culicidae), laboratory studies on the transmission of yellow fever virus by (Russell, Mukwaya and Lule), 649.

Arthropod-borne viruses in Australia, 1973-1976 (Doherty), 103.

Influenza, the ecology of. Isolation of type "A" influenza viruses from Australian pelagic birds (Downie, Hinshaw and Laver), 635.

J virus, *see* Paramyxovirus.

Northern Territory of Australia, isolation of Sindbis (alphavirus) and Leanyer viruses from mosquitoes collected in the, 1974 (Doherty, Carley, Filippich, Kay, Gorman and Rajapaksa), 485.

Paramyxovirus (J virus), mouse, a new (Jun, Karabatsos and Johnson), 645.

Ross River virus, antigenically distinct strains of, from North Queensland and coastal New South Wales (Woodroofe, Marshall and Taylor), 79.

Saumarez Reef virus, a new flavivirus, the isolation of, from bird ticks *Ornithodoros capensis* and *Ixodes eudyptidis* in Australia (St. George, Standfast, Doherty, Carley, Fillipich and Brandsma), 493.

Togaviruses, antibody to, in the Northern Territory and adjoining areas of Australia (Doherty, Filippich, Carley and Hancock), 131.

Virus, Saumarez Reef, *see* Saumarez Reef virus.

Viruses, Leanyer, and Sindbis (alphavirus), isolation of, from mosquitoes collected in the Northern Territory of Australia, 1974 (Doherty, Carley, Filippich, Kay, Gorman and Rajapaksa), 485.

Yellow fever virus, laboratory studies on the transmission of, by *Aedes* (*Finlaya*) *notoscriptus* (Dipt., culicidae) (Russell, Mukwaya and Lule), 649.
